

TO WHOM IT MAY CONCERN

AMFM Constructions Pty Ltd was the successful tenderer for the Stage 4 building extension at Lumen Christi Catholic College.

This project included a Creative and Performing Arts centre, Food Technology and Hospitality specialist rooms, fitting out of a new Science laboratory, two general learning areas, refurbishment of two rooms, fitting out of a classroom for a computer room and student amenities which included a canteen. The project was valued approximately at \$2.5m.

The principals of AMFM, Mr Daren Perich and Mr Fritz Funke, were very visible during the construction period. Mr Fritz Funke attended every building meeting held on a fortnightly basis with the Architect, CEO Project Manager, Client representatives and their Site Manager. Mr Daren Perich attended these meetings when time allowed, demonstrating that both Principals were willing to maintain close involvement in the project from a management point of view. Considering their distance from the site, their effort is acknowledged and appreciated. They acted upon requests from the Architect and client quickly to ensure the progress of work was not hampered.

AMFM Constructions' site foreman, Mr Kevin Weir, was always on site and communicated regularly with the College on issues affecting the daily running of the College. As there were a number of areas affected by internal refurbishment, Mr Weir liaised with the College to minimise disruption to the students' education. He is also commended for the management of the suppliers and sub-contractors on site. There were no issues that arose that could have compromised the safety of the students.

I wish AMFM Constructions Pty Ltd every best wish for the future and thank them for their completion of Stage 4 building project at Lumen Christi.

Yours sincerely

Paul Carroll
Principal
